Types of Substances Released:
Anhydrous Ammonia

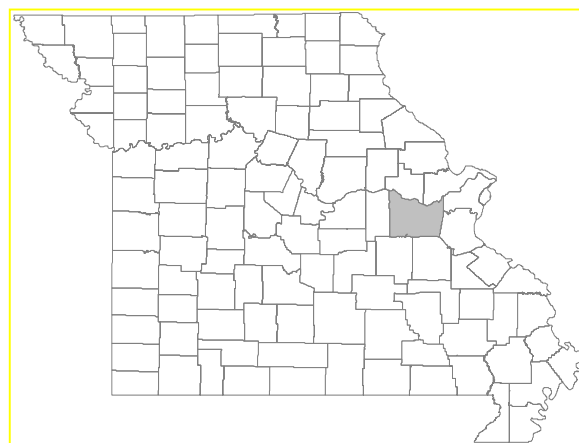

Number of Victims: 0

Types of Injuries Sustained: N/A

Injury Outcomes: N/A

Number of Events with Evacuations: 1

Number of People Evacuated: Unknown

Interesting Events:

October 2004 - Vandals, stealing anhydrous ammonia for the production of methamphetamine, left the valve open on a 30,000-gallon high pressure tank. Before the fire department could stop the release, an estimated 5,600 pounds of ammonia were released. The fire department evacuated an unknown number of residents in the area for one hour and requested Environmental Emergency Response (EER) on-scene assistance.
